Mission Statement

In a fit of its land, the Government of Jammu and Kashmir has embarked on an ambitious and extensive programme of reaching out to the people at the grassroots level to create in the rural masses an earnest desire for decent standard of living.

The 'Back to Village' programme is aimed to involve the people of the state and government officials in a joint effort to deliver the mission of equitable development. The programme is aimed at energising Panchayats and directing development efforts in rural areas through community participation.

As part of this programme, civil servants will have to reach out to each Panchayat of the State, where they will stay for a specific period to interact and obtain feedback from the grassroots so as to tailor government efforts in improving delivery of village-specific services.

The 'Back to Village' programme has been conceived with the objective of ensuring that developmental initiatives are built on the feedback and cooperation of the people, thus being more result-oriented with greater probability of success than those which are top down.

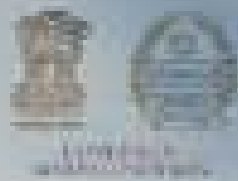

The programme revolves around the concept that while the official machinery has to guide and assist, the primary responsibility to improve local conditions rests with the people themselves. Therefore, they must be encouraged to own a programme so that benefits are maximized.

The life of a person living in a rural area is not cut into segments in the way the Government activities are prone to be. The approach at the village level, therefore, has to be a coordinated, touching all aspects of village life. Such an approach has to be made, not through a multiplicity of departmental officers, but through Panchayats.

The essence of the 'Back to Village' programme is to emphasize the importance of ensuring, right from the beginning, people's participation, not merely as an agent in the execution of the development works but as owners of the entire programme.

We hope this initiative will go a long way in achieving long term objective of grassroots democracy.

Dear Deputy Commissioner,

The new spirit of awareness, and in the active involvement of people in decision making processes with all their own specific needs. During the last one year, the Government has taken important steps in this direction. One of the successful creation of clusters in Panchayats and Village Level Committees, we have gone a step further by developing Block level and mandal level Panchayats, mandating representation of important members through them and on priority basis to carry out the work.

2. Continuing with the achievement in this direction, the government is initiating an initiative back to the Village committees which is every quarter office of the state will be alternated at the 2482 Panchayats of the state where there is no administrative two days including a night stay and interact directly with the people. This would be the first initiative of its kind in our state.

3. We are hopeful that the interaction between officers and people will be very fruitful. The better the better between the Government and the citizens but also make participatory planning reality. The wealth of first hand information which an officer will be able to collect from these interactions will help in appropriate local initiatives better and come up with appropriate interventions.

4. The overall control of the entire programme, hinges on the Deputy Commissioner who is the most vital link. Therefore, the success of the programme will largely hinge upon your co-operation and coordination with various state bodies.

5. Last therefore, writing to draw your attention to ensure the success of this programme. I urge you to devote your time and resources and carry out all such activities as may be necessary to realize the objectives of the NREGS which are envisaged with the setting up of this programme.

6. I am sure that working together through this programme, we will be able to bring about a dramatic and positive change in the rural landscape of the state and leave no individual unemployed in the time of the people residing in our villages.

With warm regards,

Yours sincerely,

Satish Pal Mallik
