THE UNIVERSITY OF CHICAGO PRESS

20

1. The first step is to identify the problem or issue that needs to be addressed. This could be a specific task, a general goal, or a challenge that the organization is facing.

2. Next, it is important to gather information and resources that will be needed to solve the problem. This could involve research, consultation with experts, or identifying internal resources that can be leveraged.

3. Once the information is gathered, the next step is to develop a plan or strategy for addressing the problem. This plan should outline the steps that will be taken, the resources that will be used, and the timeline for completion.

4. Finally, the plan should be implemented, and progress should be monitored and reported on regularly. This will allow the organization to adjust the plan as needed and ensure that the problem is solved in a timely and effective manner.

21

THE PROBLEM STATEMENT

The problem statement is a clear, concise statement of the problem or issue that needs to be addressed. It should be written in a way that is easy to understand and that clearly defines the scope of the problem.

The problem statement should also include a brief description of the background and context of the problem, as well as a statement of the importance of the problem and the need for a solution.

The problem statement is a key component of any project or initiative, and it is essential that it be written clearly and effectively. A well-written problem statement will help to ensure that the project is focused on the right problem and that the resources are used in the most effective way possible.

GOALS AND OBJECTIVES

The goals and objectives of the project are the specific outcomes that the project is intended to achieve. These should be written in a way that is measurable and achievable, and they should be aligned with the overall mission and vision of the organization.

The goals and objectives should be written in a way that is clear and concise, and they should be broken down into smaller, more specific tasks that can be assigned to individual team members. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

SCOPE OF THE PROJECT

The scope of the project is the range of activities and tasks that are included in the project. It should be defined in a way that is clear and concise, and it should be written in a way that is easy to understand.

The scope of the project should be defined in a way that is realistic and achievable, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

The scope of the project should be defined in a way that is clear and concise, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

The scope of the project should be defined in a way that is realistic and achievable, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

The scope of the project should be defined in a way that is clear and concise, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

The scope of the project should be defined in a way that is realistic and achievable, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.

The scope of the project should be defined in a way that is clear and concise, and it should be written in a way that is easy to understand. This will help to ensure that the project is completed on time and that the goals and objectives are achieved.
