Question	Answer
1. What is the main purpose of the study?	To investigate the effect of the independent variable on the dependent variable.
2. What is the independent variable?	The variable that is manipulated or changed by the researcher.
3. What is the dependent variable?	The variable that is measured or observed by the researcher.
4. What is the control group?	The group of subjects that does not receive the treatment or intervention.
5. What is the experimental group?	The group of subjects that receives the treatment or intervention.
6. What is the significance level?	The probability of rejecting the null hypothesis when it is actually true.
7. What is the p-value?	The probability of obtaining a test statistic as extreme as the one observed, assuming the null hypothesis is true.
8. What is the null hypothesis?	The hypothesis that there is no effect or no difference between the groups.
9. What is the alternative hypothesis?	The hypothesis that there is an effect or a difference between the groups.
10. What is the conclusion?	The final statement about the results of the study, based on the statistical analysis.
