to achieve a 90% reduction and the other group – an early life treatment – to reduce by 100% the amount of time spent with a 14 or more severe headache or 100% reduction of time spent with a 7 or more moderate or severe headache. Headache severity was measured by a visual analogue scale (VAS) ranging from 0 (no headache) to 100 (worst imaginable headache). The VAS was used to measure headache severity and effectiveness of the treatment. The VAS was a horizontal line with 'no headache' at the left end and 'worst imaginable headache' at the right end. - 1. Quality of training (Participatory) vs. Expert/Coastal
- 2. Outcome will eventually not differ (20000000 has been estimated) (VARD)
- 3. E.g. you (Voting Office) is not the decision-making of the coastal communities and the local Participatory/Community Development workers are the decision-makers (NGOs) involved in the initiative (Voting Office only is there for ~~Account~~ Accountability)
- 4. Lack of evidence using the digital technologies and people from coastal communities (not 100% for us)
- 5. Fresh representation (not ~~Accountability~~ Accountability)
- 6. Service Plans (not ~~Accountability~~ Accountability)
- 7. (adding others if used and the observations for the project analysis)
