2. "Wanted as soon as convenient" would be interpreted as "as soon as possible" or "as soon as you can".

It was, surely, not a complete loss.

1. The first step in the process of creating a new product is to identify a market need. This is often done through market research, which can involve surveys, focus groups, and other methods of gathering information from potential customers. Once a market need has been identified, the next step is to develop a concept for a product that meets that need. This involves brainstorming ideas and creating a prototype. The final step is to test the product in the market, which can be done through a pilot launch or a full-scale launch. This allows the company to gather feedback from customers and make any necessary adjustments to the product.
