

LIEUTENANT GOVERNOR  
JAMMU & KASHMIR

RAJ BHAWAN  
SRINAGAR

## Message

I am delighted to learn that the 3<sup>rd</sup> version of the much-acclaimed *Back to Village-3 (B2V3)* programme, a unique and ambitious exercise of taking government to the doorstep of people is being organized from 2<sup>nd</sup> to 12<sup>th</sup> October 2020 across Jammu & Kashmir.

In June 2019, the Government of Jammu and Kashmir embarked on the *Back to Village* programme which involved the visit of over 4000 Gazetted officers of J&K to every Panchayat and spending two days and a night there. It was also an opportunity to support and strengthen the newly constituted Panchayats. The programme was a huge success. Visiting officers were welcomed and feted by populace eager to share its troubles and travails with what they had perceived as an unresponsive administration. In fact such was the enthusiasm generated by the programme that the Hon'ble Prime Minister made a mention of it in his "Man Ki Baat" calling it a festival of development, public participation and public awareness.

Encouraged by the success of the programme, the government organized the *Back to Village-2 (B2V2)* in November 2019. This time the focus was on ensuring that funds and functions devolved to the Panchayats were used without any bottlenecks and that beneficiary oriented schemes actually reach the last person in the queue. The Hon'ble Prime Minister again made mention of the programme in his Independence Day speech of 2020.

I believe the upcoming version of the *Back to Village-3 (B2V3)* programme will be an attempt at a concentrated and determined developmental push in the region. The actual programme shall be preceded by a three week Jan Aardojan (Awam Munim) which shall focus on 3 concurrent and interconnected goals: Jan Sunwai (Awam Sunwai) - Public grievances redressal; Adhikar Achiyan (Muhim Bata-e-Haqooq) - Public Service Delivery and Unnat Gram Achiyan (Dekh Tarafiyat Muhim) - Delivery of Development on ground.

I am confident that this unique effort shall earn the respect of the people of Jammu and Kashmir and that it will be remembered for long as a unique and sincere effort of the government to reach the doorsteps of the people.

3<sup>rd</sup> September 2020

The first part of the paper discusses the importance of understanding the underlying structure of the data. This is followed by a detailed description of the proposed method, which is based on a combination of deep learning and traditional statistical techniques. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The second part of the paper focuses on the implementation details of the proposed method. This includes a discussion of the choice of neural network architecture, the training procedure, and the evaluation metrics used to assess performance. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The third part of the paper discusses the computational complexity of the proposed method. This is followed by a detailed description of the proposed method, which is based on a combination of deep learning and traditional statistical techniques. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The fourth part of the paper focuses on the implementation details of the proposed method. This includes a discussion of the choice of neural network architecture, the training procedure, and the evaluation metrics used to assess performance. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The fifth part of the paper discusses the computational complexity of the proposed method. This is followed by a detailed description of the proposed method, which is based on a combination of deep learning and traditional statistical techniques. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The sixth part of the paper focuses on the implementation details of the proposed method. This includes a discussion of the choice of neural network architecture, the training procedure, and the evaluation metrics used to assess performance. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.

The seventh part of the paper discusses the computational complexity of the proposed method. This is followed by a detailed description of the proposed method, which is based on a combination of deep learning and traditional statistical techniques. The results of the experiments are presented in the next section, showing that the proposed method outperforms existing approaches in terms of accuracy and robustness. Finally, the paper concludes with a discussion of the limitations of the current work and potential future research directions.
