The following table shows the results of the experiment. The data was collected over a period of 10 days. The results show a significant increase in the number of participants who completed the task. This suggests that the intervention was effective in improving performance. The data also shows that the number of participants who dropped out of the study was low. This indicates that the intervention was well-tolerated and that participants were motivated to complete the task. The results of the experiment are discussed in more detail in the following sections.
